## Light Technology Inc.

### Personal Accessory Light (PAL)

#### Survival Lite

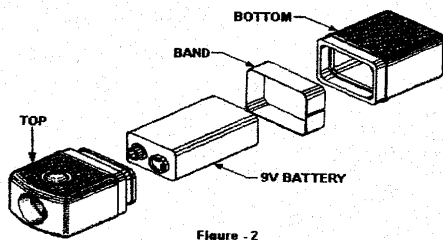

The Survival Lite white diode will provide brilliant white light longer than any ordinary incandescent bulb flashlight.

The small compact size is attributed to it's use of a 9 volt battery and is capable of providing light for up to 30 hours of continuous use.

The molded thermoplastic rubber case is available in colors of Black, Orange, Forest Green, Yellow, Adobe, and Teal

The Survival Lite produces four distinct light levels

1. "Always On" - A soft glow is visible in the lens which allows the unit to be found in the dark.
2. Low intensity - A mode that produces a sharp and eminent light level for reading.
3. Emergency Light - A level that emits a higher level of intensity for illuminating distant objects.
4. Distress Strobe - an intense and acute flashing beam of light for signaling distress.

Color	Part number	NSN
Black	SURBLK	6230-01-465-3082
Orange	SURORG	6230-01-465-3084
Forest Green	SURFORGRN	6230-01-465-3085
Yellow	SURYEL	6230-01-465-3089
Adobe	SURADO	6230-01-465-3106
Teal	SURTEA	6230-01-465-3112
